

SOCIETY HACKATHON 5.0

PRANSHU RASTOGI

PROBLEM SOLVED -

- Implemented immutable Tx Hash storage.
- Reduce redundancy of document upload.
- Adding of government authorities by Super Admin.
- Verification of document by govt. Authorities
- Full data of Document by its hash and also the verification status.
- Addition of document by giving its hash.

ISSUES FACED -

- Addition of Government authority with a set of all the documents they provide with a level of permission to verify.
- Integration with Front-end

FUTURE PROGRESS -

- Document verification will be done through Artificial Intelligence and status will be recorded in Blockchain. Of course, will provide manual verification also to ensure errorless system.
- Built a separate node on Hyperledger Fabric that will link criminal cases with these document to provide socialising points.
- Will Integrate Hyperledger Indy for Identity management for a better performance and ease.
